introducing

THE WORLD'S MOST INNOVATIVE COACHING PRODUCTS

Dedicated to Coaching & training

Welcome to the 2018 Katchet catalogue. Those who know us will be aware of our desire to continue to develop innovative training and coaching products for Sportspeople and their coaches all round the world.

We distribute into every continent in the world (except Antarctica!), our products are universally used by every International team without exception, a fact which gives us much confidence as we continue with the considerable challenge of bringing genuinely unique and beneficial products to the market.

The KatchMax has been a valuable addition to our 2017 range. It has given players of all levels a new experience and challenge, adding positively to the ever popular Katchet.

We are now coming into the 3rd year of the KoachSak and having added the KlubSak and KoachSak duffle in 2017 to cater for the needs of all cricket and hockey coaches we are proud to introduce the KoachSak Pro, which like the KlubSak is designed for Multi-sport use.

We continue to look at improving our current products and are pleased to relaunch the market-leading and popular Skyer.

We are always on the lookout for new materials to improve both the Skyer and Multi-stump range and this still continues so customers are assured that these products are at the forefront of technology.

We are also now selling the famous Sidearm range. This small company, with the same innovative values as ourselves, produce a product tailor made for our customers.

We continue to innovate and I hope to introduce more products to you next year.

Have a great season.

Colin Smith

The KatchMax is an ‘app’ for your Katchet, adding to your training experience it is a valuable tool to challenge and improve the modern player.

The KatchMax sits on top of your Katchet, meshing with its grooves, and providing a slim line product which can deflect a cricket or hockey sized ball to extreme levels capable of challenging all players in varied and match specific ways.

We wanted to give players and coaches another level of deflection to use in whatever way it fits their training needs.

The KatchMax is designed to provide varied deflection up to extreme to practice foot movement and those spectacular diving catches and saves.

The purpose of the ‘app’ design, as well as being space saving, was to provide a coach with the option of placing the KatchMax flat on the ground, possibly alongside a Katchet to provide ground variation.

Whether you are an Olympic gold medalist, hundred test veteran or just starting out the KatchMax will add something to your preparation.

We are very proud to launch the NEW KoachSak Pro. The KoachSak concept was so successful that coaches of all sports started to look at the idea and want a bit of the action.

As a result we saw coaches from the world of Football, rugby, netball, tennis, badminton to name a few using our bags for their equipment. We therefore redesigned the interior to provide even more flexibility to individual coaches so they could configure their KoachSak precisely to their needs.

To do this we removed the rear compartment to create one large storage area. We provide 2 removeable Velcro dividers so this area can be sub-divided into as many as 3 areas.

We still include our innovative side splints and base reinforcement and have added a lockable extendable handle and additional external base protection.

The BallSak and store tube (pictured right, in orange) are purchased separately for this model if required.

Key features

- 1 One large compartment with 2 moveable stiff dividers
- 2 Large external pocket for ancillary items
- 3 Additional base reinforcement
- 4 Wheelie bag with lockable Extendable handle
- 5 Rucksack handles
- 6 Convenient high position valuables pocket
- 8 Unique side splints for vertical stability
- 9 Easy open zip toggles
- 10 Two A4 sized external netting pockets
- 11 Available in Orange, blue, yellow & red trim

The original and World's first kit bag designed exclusively for the modern Coach. Due to the advent of modern training aids we were aware of the lack of a functioning and practical bag on the market for coaches and became so frustrated we designed our own and called it the KoachSak.

When we wrote a list of the requirements there had to be no compromises and in the spirit of the Katchet brand, it had to be just as relevant to the Test Match arena as the Village green.

We asked a group of coaches, some International, some not, what they carried in their current bags and discovered all were different to some extent. As a result the KoachSak had to be versatile with moveable partitions so as to enable the coach the ability to adjust the bag to the individual or team needs.

It had to be practical, therefore easily packed and unpacked. Pockets and spaces designed for multiple purposes. It had to be easily moved or carried and whether full or empty it should be stable and remain upright.

It also had to fit products other than our own!!

Key features

- 1 Rear stump/bat compartment
- 2 Front compartment with moveable divider
- 3 Large external pocket for ancillary items
- 4 Ballsak included for up to 24 balls.
- 5 Moveable store tube
- 6 Reinforced base and side compartment
- 7 Wheelie bag with Extendable handle
- 8 Rucksack handles
- 9 Convenient high position valuables pocket
- 10 Unique side splints for vertical stability
- 11 Easy open zip toggles
- 12 Two A4 sized external netting pockets
- 13 Available in Orange or Sky Blue trim

BALLSAK

Ballsak - Has been designed to neatly fit into the entire KoachSak range, and provides sufficient room for 24 balls. If this is not enough a further Ballsak will fit alongside. Every KoachSak comes with a Ballsak included but additional units can be purchased separately. Available in orange or navy.

KOACHSAK

duffle

Designed for all coaches the duffle version of the KoachSak was made to provide a lighter, leaner version for the coach who likes to carry less equipment, but still wants the convenience, organization and versatility of a KoachSak.

The design incorporates a 'clam-shell' opening, which makes identifying and removing the contents easier. Also included is one removeable Velcro divider to split the large compartment into two if required.

There is an internal base reinforcement to protect it from sharp objects and the exterior is protected from the elements by a rubber cover.

Sold outside the UK as the KoachSak Klub this model has the same configuration as the NEW KoachSak Pro.

Designed as a Multi-Sport coach/team bag the KlubSak provides many of the big advantages of the Pro but without the bells and whistles!

Key features

- 1 One large compartment with 2 moveable fabric dividers
- 2 Additional base reinforcement
- 3 Wheelie bag with fabric pull handle
- 4 Rucksack handles
- 5 Unique side splints for vertical stability
- 6 Easy open zip toggles
- 7 Available in Red or Yellow trim

FUSION MultiStump

The Multi-stump is aptly named due to the multiple roles it can perform. This revolutionary product takes the previously functional stump into the 21st century.

It not only provides the coach and player with a versatile training aid but it is weather resistant, durable, light, flexible, exceptionally safe and due to the interchangeable spike and all-weather base useable on grass or any hard surface.

Shorty MultiStump

Now we introduce the Multi-stump Shorty, which at 14 inches high is ideal for focused base of stump bowling and fielding practices.

**NEW IMPROVED All-weather base
made from recycled plastics.**

The Skyer is the original coaching bat. Using Fusion's unique high performance FOB the Skyer provides outstanding rebound and hang time.

The Skyer range is back for 2018 again sporting the Skyer alongside the lighter, shorter Bmax there is a coaching bat for everyone.

Made with Fusion's very own high performance FOB both the Skyer and Bmax give excellent performance for those big hangars and little effort.

The purpose of the Bmax is to provide a coaching bat with excellent performance but lighter and easier to manoeuvre. Ideal for the high volume user.

Just like the rest of our range Skyers are used by the majority of International and first-class coaches but equally as much benefit at all clubs and schools.

KATCHET

The Katchet has become one of the leading coaching aids in the world. Used by international cricket and hockey teams all over the world it is a must-have in any coach's kit bag.

The Katchet provides every player at any level, position specific and match real practice easily and repetitively to improve their abilities and game performance. Providing random, unpredictable deflections the Katchet can improve every teams fielding, catching, goalkeeping and reactions, safely and enjoyably.

The Katchet is designed to test one person of any ability but can be combined, side by side for more participants or to provide additional deflection for those diving catches and saves.

KATCHET FOR CRICKET

KATCHET FOR HOCKEY

The Eye-In™ cricket practice device has combined the age-old practice technique of the cricket ball in one of Mums' old stockings with the golf ball and stump technique used by cricket's greatest ever batsman, Sir Donald Bradman.

Using our innovative clip system which allows the user to easily change between cricket ball and golf ball, combined with the quality Eye-In™ training bat, the Eye-In will help players of all ages and ability to improve their game.

An extra benefit is the fact that the user can take their Eye-In™ training bat into the nets for technique practice with somebody throwing cricket balls to them.

Original footage of the great Don Bradman is contained within the DVD which is included in the Eye-In™ package.

- Technique

Following the product development process in early 2016, the Sidearm PRO sold last year was extremely fast, and more akin to the SIDEARM ELITE sold in Australia and other overseas territories.

For this reason SIDEARM have decided to move forward with the ELITE as the product for quality practice for cricketers of high standard. In the right hands, the SIDEARM ELITE can reach upwards of 85mph. Higher level players can provide hours of fast paced, exciting and unparalleled practice with the ELITE.

The ELITE is harder to master and is specifically aimed at players accustomed to facing quick bowling. We have also taken on board feedback from professional users who found it difficult to sight a white ball from the white sidearm, so the SIDEARM ELITE is coloured pink to provide good sighting for both red and white balls. GO PINK!

Sidearm Elite

Designed to propel a cricket ball up to 85mph the Elite is the Sidearm for batsmen and women looking to practice facing fast bowling.

It is being manufactured in Pink to allow for easier sighting of both white and red balls.

Sidearmclub

Club version of the popular Sidearm. Designed to propel the ball up to 65mph.

Manufacture has now moved to the UK and is being made in a new material giving enhanced performance. Easier to use than the Elite but still capable of challenging pace and variation of deliveries.
