KOACHSAK

Sak Manual

Thanks for purchasing your KoachSak, the first bag designed for you the Coach.

We at K are about improving players and the coaches who help them.

Within your KoachSak we have included a number of features to make life a little easier for the Coach. So to get the most out of your 'Sak' please read on.

Please check you have the following pieces:

- 1 x KoachSak (quite important!)**
- 1 x BallSak**
- 1 x Divider**
- 1 x Bat tube**
- 2 x Splint support**

We realised that every Coach is different so we have designed the 'Sak' to be versatile. The inside of your KoachSak is lined with Velcro. This allows you to place the Divider wherever you want or can be totally removed.

The Bat tube can be placed wherever is most convenient in the front or rear compartment.

The Splint supports are the solution to our biggest bug-bear -so called 'upright bags' which fall over. You will notice on each side of the internal side panels a small diagonal zip.

Open the zip and place the Splints into the sleeve nearest the external material. The splint [1] will slide diagonally down so the bottom of the splint is near the front of the Sak. Close the zip, repeat on the other side and hey presto you own an Upright bag which stays upright!

(Our BallSak is sized to conveniently and comfortably fit within your 'Sak'. Two can fit alongside each other and extra BallSaks can be purchased separately.

The rest we hope is self-explanatory, but if you have any issues or wish to offer an improvement to our Saks have a look at our website www.katchet.com and get in touch.

Other features Include the rucksack straps [2] with integrated lifting handle, plus one handle on the front [3] and one on the base to enable lifting in and out of cars etc. Also a convenient clip to secure the rolled up front flap.

Have a great season and keep training hard.
